

An Introduction and Terms of Service

The *INFOCON County Access System* is an Internet based Access Service for those in need of information on a regular basis from various county government public information databases. This Internet Access Service is provided through arrangements with participating counties. These arrangements allow this service to provide you access to the various existing public computer inquiries, including document images, presently available only by going to the courthouses during regular courthouse business hours. The *INFOCON County Access System* is accessible 24 hours a day, 7 days a week, on a subscriber only basis, with the use of the subscriber's personal computer accessing the *INFOCON County Access System* Web Site on the Internet.

DISCLAIMER

By using this service you agree to hold harmless and indemnify the participating counties and *INFOCON Corporation*.

The *INFOCON County Access System* facilitates the retrieval of certain information residing on servers at our data center and various remote county locations. The response time you experience is directly affected by a number of factors, many of which are beyond *INFOCON's* control. These factors include, but are not limited to, the band width and traffic load of the circuits between you and *INFOCON*, and *INFOCON* and the particular county you may be accessing. Response times are also directly affected by band width, activity levels, volume of records to be searched, and work loads of each of the servers utilized in the routing process at the time of your inquiry.
